

# Direct Energy Business Services Limited

## Company Profile

Direct Energy Business Services works in buildings to reduce energy costs.

We take pride in providing an added value to customers through customized energy management solutions and integrated retrofit technologies. Through the optimization of energy, we reduce your consumption, operating costs, environmental impact, and renew your building infrastructure.

We listen to your energy needs, analyze your current usage requirements, and devise a strategy to address your energy management goals. You can rely on us to deliver the highest levels of customer care and service efficiency to help your business control your energy costs.

## Our Services

Direct Energy Business Services provides integrated, customized and practical solutions to businesses throughout Canada. With our depth of experience, knowledge and size, we are ready to help you make informed energy management decisions.

**Energy Services.** We have expertise in extracting energy savings from existing buildings. We offer recommendations for reducing your energy consumption and maximizing cost savings.

Our suite of Energy Services includes:

- Energy assessment and analysis
- Energy performance contracting
- Energy equipment and retrofits
- Measurement and verification

### **Heating, Ventilation & Air Conditioning (HVAC).**

We offer a full suite of Heating, Ventilation and Air Conditioning services built on more than 45 years of experience. Whether you operate a single building or manage a continent-wide portfolio, we offer timely and cost-effective solutions.

Our suite of HVAC services includes:

- Preventative maintenance and demand service
- Chiller service

**Technology.** We offer centrally managed and controlled integrated building automation systems to monitor and automatically adjust the building environment for energy conservation goals.

Our suite of Technology includes:

- Building Automation Systems (BAS)
- BAS maintenance and service
- iControl Center®

**Energy Efficiency Products.** Support your cost savings objectives with energy efficiency products that help you control energy consumption and reduce or offset demand charges.

Our suite of Products includes:

- Smardt Chiller
- Member of Canadian Environmental Equipment Manufacturers Alliance (CEEMA)
