## Benefits of an Energy Strategy from Direct Energy Business

### ■ Experienced Energy Service Provider

With more than 20 years of industry experience, we are dedicated to helping organizations across all sectors optimize their energy management strategy and gain greater control of their energy budgets. We are highly experienced in helping commercial and industrial businesses implement custom energy purchasing strategies to effectively manage their energy costs and achieve maximum efficiencies in their operating budgets.

### ■ Straightforward Guidance

We are a trusted commercial retail energy supplier dedicated to providing you with the best guidance to your energy management decisions. Our pricing, product and educational information will give you a clear view of the industry and your electricity and natural gas choices.

### ■ Energy Advocacy

Direct Energy Business delivers much more than electricity and natural gas supply. We're here to act as your advocate for energy choice by keeping our eyes, ears and voice in the energy policy sphere. Our in-house regulatory experts are active in each of our service areas, and we regularly share their insights with you, including advance notice of rulemaking changes and analysis of the projected impact on your energy management strategy.

### ■ We Understand Your Business

Our solutions begin with you. No matter what size your organization, we begin our relationship by getting to know your business. We want to learn about your energy profile, risk tolerance and business objectives, so we can customize an energy management strategy that supports your specific performance goals.

## Gain control of your energy spend

As a healthcare facility, your load requirements and consumption patterns create energy management challenges, but also open opportunities for cost control. We are experienced at helping single- and multi-site healthcare organizations take a comprehensive view of their energy procurement needs.

We commit to understanding your organization's budget and business objectives. Then, we can recommend energy strategies that are cost-effective but never lose sight of the first priority—first-rate patient care.

## Industry-Leading Product Offerings

With a variety of industry-leading products and services, we can help you devise and implement a custom energy strategy that supports your business objectives.

- **Fixed Price.** Gain greater budget control with a fixed rate for your electricity and natural gas supply. We can recommend strategies for gaining cost predictability in dynamic market conditions.
- **Index Priced.** Mitigate the risks of locking in your entire supply at relative highs. Our index priced (market-based) electricity and natural gas products offer flexibility to ride the market in pursuit of strategic buying opportunities.
- **Heat Rate.** Purchase electricity supply for your Texas facilities with a transparent, competitively priced rate that's linked to the natural gas market. Our Heat Rate product offers added risk management value, with the option to convert to a fixed price term to take advantage of favorable market conditions.
- **PowerPortfolio®.** Create a custom energy strategy that includes fixed and market-based prices with the PowerPortfolio product. Gain customized planning and dedicated management of your procurement strategy from a Portfolio Strategist who actively monitors markets for buying opportunities that optimize your energy spend.
- **Make Me Green™.** Enhance your energy strategy with renewable energy certificates (RECs), an increasingly popular and cost-effective choice for corporate sustainability programs. Each Make Me Green REC purchase serves as proof of your support of the advancement of renewable energy technologies.
